

MUNEEB UR REHMAN

Ali Town, Lahore | 0313-4964755 | muneebrehman418@gmail.com

PROFESSIONAL SUMMARY

Analytical and tech-savvy Computer Science student with practical experience in AI data operations, process mapping, and software logic. Proven track record of executing technical tasks under tight deadlines, including high-pressure hackathon builds and remote, asynchronous data validation. Aspiring Software Quality Assurance (SQA) / Tech Operations Intern focused on identifying software anomalies, ensuring product quality, and optimizing team workflows.

WORK EXPERIENCE

AI Operations Specialist — Freelance / Remote

March 2025 — March 2026

- Evaluated and rated AI-generated outputs for factual accuracy, structural integrity, and logic validation.
- Engineered and refined detailed prompts to stress-test large language models across technical domains.
- Identified, documented, and reported edge cases and behavioral patterns to support iterative model improvements.
- Managed daily deliverables independently in a high-velocity, asynchronous environment meeting strict quality benchmarks.

Operation Associate (Internship) — EDUFI

November 2024 — December 2024

- Supported cross-functional workflows by mapping internal technical processes and identifying operational bottlenecks.
- Authored and updated technical documentation, user guides, and system workflows for internal teams.
- Assisted in database validation routines and verified system data integrity to support daily fintech operations.
- Monitored operational tools and system dashboards, reporting technical glitches directly to the engineering team.

Web Developer (Internship) — Nithio

April 2024 — September 2024

- Designed responsive web layouts ensuring cross-device compatibility and smooth user navigation.
- Collaborated with team members to gather frontend requirements and implement clean UI components.

Data Entry Specialist (Part-time) — Ahmed Assistance

February 2025 — May 2025

- Handled large-scale data verification, filtering, and entry with high precision under tight delivery timelines.

PROJECTS

TrackRight — AI Hackathon Prototype (Top 10 Finalist)

HalShnas BNU Lahore Hackathon (2025)

- Rapidly designed and deployed a mobile-optimized software application within a strict 5-hour time constraint during a live developer competition.
- Integrated AI tools to accelerate development velocity, successfully placing in the Top 10 out of competitive submissions.
- Aligned application logic to address core metrics of SDG 4 (Quality Education) and SDG 8 (Decent Work).

PayFlow — Android UI Mobile Layout

Academic Project (2024)

- Developed a multi-screen mobile banking interface application in Android Studio using Java/XML layouts.
- Implemented structured MVVM architecture patterns to manage frontend screen flows and simulate user transaction journeys.

EDUCATION

BS Computer Science

Superior University, Lahore (2023 — 2027)

- *Core Coursework:* Data Structures, Algorithms, Software Engineering, Mobile Development, Database Systems.

English Learning Course — Oxford English Coaching (May 2024 — Aug 2024)

SKILLS & CERTIFICATIONS

- **Programming & Tools:** Python, Java, SQL, HTML/CSS, Android Studio, Git, Microsoft Office, Google Workspace.
- **Core Competencies:** Software Testing (Manual/Logic), Data Validation, Process Documentation, Prompt Engineering.
- **Certifications:** Python Programming Track (Harvard) | Advanced Computer Course (TEVTA) | Operations Associate (EduFi).
